PŘED MONTÁŽÍ

Před zahájením montáže si důkladně prostudujte tyto pokyny. Výrobek vyžaduje pro montáž minimálně 2 osoby. Vyhradte si na montáž dostatek času, doporučujeme alespoň půl dne. Skleník musí být umístěn a upevněn na rovném povrchu. Zvolte slunné místo daleko od převislých stromů. Pokud připevňujete skleník přímo na pevný betonový základ, použijte předvrtané otvory v dodaném kovovém základu. Dodržujte montážní kroky v přesném pořadí. Vyjměte všechny komponenty a díly z balení. Před instalací zkontrolujte všechny součásti a díly. Všechny díly jsou označené číslem, při kontrole tato čísla porovnejte s dodaným seznamem dílů. Díly by měly být položeny v dosahu ruky. Uchovávejte všechny malé díly (šrouby apod.) v misce či jiné nádobě, aby se neztratily. Upozorňujeme, že tento produkt používá víceboké profily. V důsledku toho některé otvory v profilech nejsou použity během montáže.

DOPORUČENÍ

Pro snazší nastavení polohy jednotlivých dílů v průběhu montáže šrouby pevně neutahujte. Všechny šrouby by měly být pevně utaženy až v posledním kroku montáže. Na rám, kde se spoje dotýkají a kde se rám dotýká krytu, doporučujeme nalepit nebo přidat pěnu/gumu. Prodlouží to životnost krytu.

BEZPEČNOSTNÍ POKYNY

Před montáží skleníku se ujistěte, že v zemi nejsou skryté trubky nebo kabely. Důrazně doporučujeme při montáži použít pracovní rukavice, pevnou obuv, ochranu hlavy (např. bezpečnostní přilbu) a ochranné brýle. Konstrukci skleníku nijak neupravujte. Během instalace na rám nezavěšujte žádná závaží, ani díly. Nepokoušejte se sestavit skleník za větrného nebo deštivého počasí. Neumísťujte skleník na místo vystavené nadměrnému větru. Nesestavujte skleník v dosahu elektrického vedení. Při montáži neposouvejte skleník. Udržujte děti mimo oblast montáže. Nepokoušejte se sestavit skleník, pokud jste unavení, užili jste drogy, alkohol nebo pokud míváte závratě. Při používání žebříku nebo elektrického nářadí dodržujte bezpečnostní pokyny výrobce. Horké předměty, jako jsou nedávno použité grily, hořáky apod., nesmí být uloženy v blízkosti skleníku. Neručíme za škody nebo zranění vzniklá nesprávnou instalací, neoprávněnými úpravami nebo extrémním počasím. Tato stavba není určena pro bydlení.

PO MONTÁŽI

Pravidelně procházejte kolem skleníku a důkladně ho kontrolujte, abyste se ujistili, že všechny části jsou správně upevněny a celá konstrukce je v pořádku. Zkontrolujte všechny šrouby a matice i všechny spoje, abyste se přesvědčili, že jsou ve správné poloze. Důrazně doporučujeme ihned odstraňovat napadaný sníh. Nenechávejte sníh ležet na střeše přes noc. Na všech stranách vždy udržujte volný prostor v šířce cca 1 metru. Nenechte sníh hromadit po stranách skleníku. Jinak by tlak z boků tlačil směrem dovnitř a mohlo by dojít ke zhroucení skleníku.
Střecha unese tlak sněhu max. 40 kg/m².

ÚDRŽBA

K čištění skleníku používejte vhodné čisticí prostředky, které poté opláchněte vodou. K čištění nepoužívejte aceton, abrazivní čističe nebo jiné speciální přípravky.
